## CleanScape Eligible Practices

Think about your car before and after a rain storm. It looks cleaner, doesn't it? All of the dirt, oil, and road pollution that used to be on your car washed down the street and likely went down a storm drain without treatment. Now, all of the things that you didn't want on your car are in local water bodies. The same process happens with your house and driveway, although you might not have noticed it. Stormwater runoff is responsible for 20% of water pollution to the Chesapeake Bay. As you might guess, this

has impaired our local waterways including the Patuxent River and the Patapsco South Branch. You can stop runoff in its tracks by installing a CleanScape. Read on to learn more about each CleanScape option. Howard County also maintains a credit and reimbursement financial incentives program that can help to defray the cost in the following ways:

1. Reimburse up to 50% of the cost of installation (certain caps and minimum treatment area apply - see [www.cleanwaterhoward.com](http://www.cleanwaterhoward.com) for details)
2. Apply 20% annual credit against Watershed Protection Fee
